

Wisconsin  
Poison Center®

*A program of Children's Hospital of Wisconsin.*

Dear Teacher,

Thank you for your interest in poison prevention teaching materials. Children younger than six years of age are most often the victims of accidental poisoning.

The Wisconsin Poison Center, a program of Children's Hospital of Wisconsin, has prevention programs for all ages. We apologize that we cannot accommodate all requests for presentations.

For your convenience, you can download all the necessary teaching materials including: objectives, curriculum, poison fact sheet, curriculum evaluation and activity sheets from our Web site at [www.wisconsinpoison.org](http://www.wisconsinpoison.org). Use the information to promote poison safety. We also have included a letter to parents. Please copy this and send it home to parents, so they are aware that their child has been studying poison safety. You also may want to use the information in a school newsletter.

If you are interested in providing Mr. Yuk stickers to your students, please download and complete the 'Brochure Order Form' and mail it or fax it to the center. Please allow 4 to 6 weeks for delivery.

You may copy any of the enclosed materials for distribution. Encourage other teachers to visit our Web site, too. For poison information, visit our Web site at [www.wisconsinpoison.org](http://www.wisconsinpoison.org) or send a request to us: Wisconsin Poison Center, Attn: Anna Travis, RN, P.O. Box 1997, Suite C660 Milwaukee, Wisconsin 53201-1997, or call our toll-free number at 1-800-222-1222.

Together, we can prevent poisonings in children.

Thank you,

Anna Travis, RN, CSPI  
Poison Center Outreach and Education Coordinator
