

**NEWS YOU
CAN USE**

**Wisconsin
Poison Center**

Poisonings don't take vacations.

Poisonings often happen
when normal routines or
environments change.

Keep your family safe while you travel.

Keep medicines and personal products (including those provided by hotels) out of reach of children. Keep them in their original containers.

Upon check-in, take a few minutes to inspect and child-proof your vacation rental or hotel room. Same goes if you're staying at the home of friends or family.

Almost anything can be poisonous if it's used in the wrong way, in the wrong amount, or by the wrong person.

**If you suspect a poisoning,
don't take a chance.
Call 1-800-222-1222.**
