

HAPPY HALLOWEEN

STAY SAFE AND FOLLOW THESE POISON TIPS!

When using dry ice, always wear gloves and handle with care. Dry ice can lead to serious burns if used improperly.

Be careful with glow sticks, and call us if glow stick liquid is splashed on skin or into eyes.

Before eating candy, check for torn, punctured, or discolored wrappers.

When using makeup, make sure to do a test on a small area of skin (like your arm) to check for allergic reactions before applying to your face.

Don't let this spooky night become too scary with an unexpected poisoning. Call us for poison questions or emergencies at 1-800-222-1222.
