Kim Webber, Manager
Wisconsin Poison Center
PO Box 1997, Suite C660
Milwaukee, WI 53201

Dear Ms. Webber,

Wisconsin Department of Health Services (DHS), Division of Public Health/Bureau of Community Health Promotion, is pleased to submit a letter of support for the Wisconsin Poison Center (WPC) on behalf of the Center’s efforts to achieve American Association of Poison Control Centers (AAPCC) Regional Certification.

The WPC is the sole poison information service operating in Wisconsin. As required under Wis. Stat. § 146.57, the WPC provides 24-hour, 365 days-a-year service to all Wisconsin residents and health care providers (via a federal toll-free number). Since 2001, the WPC has served as the state’s sole poison center, providing service to all 72 counties across Wisconsin.

The Division of Public Health contracts with the WPC to provide statewide poison control services utilizing appropriated general purpose revenue. There is no out-of-state poison center serving areas of Wisconsin.

The WPC has worked closely with numerous programs in DHS to provide public and professional education and outreach programs, as well as public health exposure surveillance throughout the state.

If you require further information, please contact Melissa Heinz, Contract Administrator 608-266-1451, melissa.heinz@dhs.wisconsin.gov.

Sincerely,

[Signature]

Jennifer C. Ullsvik

RE: Poison Center Services and HIPAA

Dear Ms. Webber,

It has come to the Department's attention that some Wisconsin providers may have concerns about the applicability of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) as it relates to providing health care information to the Wisconsin Poison Center. Such providers are to be assured that, under HIPAA; the federal government recognizes poison centers as health care providers performing a treatment activity to an individual. The preamble to the Privacy Rule specifically mentions poison control centers, stating:

We note that poison control centers are health care providers for purposes of this rule. We consider the counseling and follow-up consultation provided by poison control centers with individual providers regarding patient outcomes to be treatment. Therefore, poison control centers and other health care providers can share protected health information about the treatment of an individual without a business associate contract1.

For the purposes of HIPAA, the Wisconsin Poison Center is a health care provider delivering treatment. As such, "A covered entity [such as Wisconsin healthcare facilities or other providers] may disclose protected health information for treatment activities of a health care provider2." In fact, to do so is in the best interest of poisoned or potentially poisoned Wisconsin patients.

We hope this information addresses any concerns that you may have.

Sincerely,

Kathy Johnson
Privacy Officer
